## Linssen One-Touch Variotop®

The Variotop® is part of an integrated concept in which the convertible top, wheelhouse, helmsman's position and bench seat form one ergonomic, comfortable and aesthetic unit. The result is an unbelievable sailing experience on every yacht in our Variotop® range.

If you choose the Variotop®, you actually get three yachts in one. Switching between the three takes a matter of seconds. When you close the Variotop®, you create a yacht with a comfortable wheelhouse and excellent all-round visibility. Very pleasant, especially during the cold seasons. When you open the Variotop®, you transform your yacht into an aft-cabin model without canvas. With the cockpit bench in its highest position, you can look out over the windscreen and experience the elements in all their glory. If you want to keep the heat out and let in a cooling breeze on a summer's day, put the Variotop® in the bimini position. This creates a fantastic flybridge.
